

DEFENDER® TECHNICAL BULLETIN

Defender (NaDCC) is a broad-spectrum disinfectant effective against a range of bacterial and viral pathogens. While not tested against this specific strain of coronavirus, there are a number of Corona Viruses such as Porcine Epidemic Diarrhea virus (PEDs) included on the Defender Master Label that are similar presently causing the SARS-CoV-2 pandemic.

Defender (Klorkleen 2) is registered with the EPA for emerging viral pathogens at the highest level – 2c. SARS-CoV-2 has been identified as a level 2a emerging pathogen. Defender would be recommended at 4306 ppm – 1 large tablet (13.1g) per 32 ounces of water – with a 1-minute contact time.
