

SplashBlocker

How Are You Preventing Toilet Plume Aerosolization?

SPLASHBLOCKER™

A Novel Clinical Safe Guard

Protecting Nurses, Caregivers, Visitors, Family Members and Healthcare Personnel

- Reduce HAIs
- Increase Employee Safety
- Cost Efficient
- Easy To Use
- Easy to Clean
- Environmentally Friendly

Toilet plume occurs when flushing aerosolizes pathogens. These plumes can travel up to **3 feet** while in the air.

Uncovered plumes can cause lingering exposure to **Chemotherapy drugs, C. diff, and Coronavirus.**

Current plume management solutions are less environmentally friendly, less effective, and costly.
